CS 3083 Course Project

Team Members: Mickey Shamah and Clara El Azzi

Mickey completed the public info page and staff functionalities, including signing in, logging in, viewing flights, creating flights, changing flight statuses, adding airplanes and airports, viewing flight ratings, scheduling maintenance, viewing frequent customers, viewing earned revenue, and logging out.

Clara completed customer functionalities, including signing in, logging in, viewing personal flights, searching for flights, purchasing tickets, canceling trips, giving ratings, commenting on previous flights, tracking spending, and logging out.

As for the files with queries and use cases, both group members worked on them.
